Alexandria, VA 22313-1450

Dear Sir:

Upon reviewing the above-identified patent, Patentee noted an error which should be corrected.

The following error was not in the application as filed by applicant:

In the Claims:

Column 14, Line 4, In Claim 16, delete "claim 6", and insert -- claim 11 --.

Enclosed please find a copy of the Amendment to the Claims filed on March 22, 2005.

01 FC:1811

100.00 0P

**JAN 27 2006**

The following error was found in the application as filed by applicant. The error now sought to be corrected is an inadvertent typographical error, the correction of which does not involve new matter or require reexamination.

**In the Figures:**

Box 472, Line 2 (FIG. 17), Delete “selction” and insert -- selection --.

Transmitted herewith is a proposed Certificate of Correction effecting such amendment. Patentee respectfully solicits the granting of the requested Certificate of Correction.

The Commissioner is authorized to charge any deficiency of up to \$300.00 or credit any excess in this fee to Deposit Account No. 04-0100. Enclosed please find a check for \$100.00.

Dated: January 19, 2006

Respectfully submitted,

By 

Flynn Barrison

Claim 11 (Previously Presented): The signal processing apparatus of Claim 1, wherein the computation units are flexibly configured and connected to perform any one of several different transceiver functions.

Claim 12 (Previously Presented): The signal processing apparatus of Claim 1, wherein the computation units are configured to perform one or more of downconversion, dechannelization, demodulation, decoding, equalization, despreading, encoding, modulation, spreading, and diversity processing.

Claim 13 (Previously Presented): The signal processing apparatus of Claim 1, wherein the computation units support time-division, code-division, and/or frequency division processing.

Claim 14 (Previously Presented): The method of Claim 6, wherein the computation units are flexibly configured and connected to perform any one of several different transceiver functions.

Claim 15 (Previously Presented): The method of Claim 6, wherein the computation units are configured to perform one or more of downconversion, dechannelization, demodulation, decoding, equalization, despreading, encoding, modulation, spreading, and diversity processing.

Claim 16 (Previously Presented): The method of Claim 6, wherein the computation units support time-division, code-division, and/or frequency division processing.
